JOSEPH AYENI

Senior Full-Stack Software Engineer • AI & Scalable Systems

Phone: 08144503637 • **Email:** manlikejoee@gmail.com • **GitHub:** github.com/sirius-cma201 • **Portfolio:** mlj-nine.vercel.app

CORE TECHNICAL CAPABILITIES

Languages & Frameworks:	TypeScript, JavaScript, Python, Node.js, NestJS, Express, React (18/19), Next.js, Vite, Tailwind CSS
Architecture & Data:	PostgreSQL, MongoDB / Mongoose, RESTful APIs, Server-Sent Events (SSE), Web Audio API, WebXR / Three.js
AI, Cloud & Infrastructure:	OpenAI Integrations, Vector Store Workflows, AWS (EC2, S3, SES), PM2, Stripe & PayPal, Docker, CI/CD

SELECTED PRODUCTION SYSTEMS & CASE STUDIES

Martha AI — Full-Stack Software Engineer

Production SaaS

AI Customer Operations & Autonomous Communication Platform

`React • Next.js • NestJS • PostgreSQL • OpenAI • Vector Stores`

- **AI Onboarding & Workflows:** Engineered full-stack AI-assisted business onboarding with automated description generation, schema data modeling, and vector training pipelines.
- **Security & Reliability:** Implemented role-based access control (RBAC), team hierarchies, centralized multi-channel communication tools, and real-time analytics; built session recovery workflows and automated test coverage across frontend and backend services.

Fantasy Ikoyi — Lead Full-Stack / Creative Tech Engineer

fantasyikoyi.com ↗

Spatial Commerce, Real-Time Auctions & Cultural Brand Platform

`React 19 • TypeScript • Node.js • SSE • Web Audio • WebXR • AWS EC2`

- **End-to-End Delivery:** Assumed 100% architectural and operational ownership at 70% pre-launch; stabilized codebase and shipped core capabilities to production with 100% post-launch uptime on AWS EC2/PM2.
- **Real-Time & Creative Tech:** Built real-time art auctions with Server-Sent Events (SSE) and passwordless magic-link JWT auth; engineered an interactive SVG garment customizer with dynamic multi-currency pricing (NGN/USD/EUR/GBP), a zero-asset procedural Web Audio synth, and Google <model-viewer> WebXR 3D projection.

Black Pride & Black Pride Canada — Lead Full-Stack Engineer

blackprideyyc.org ↗ • blackpride.ca ↗

Community Digital Ecosystem, LMS Engine & Mental Wellness Hub

`React 18 • TypeScript • Node.js • MongoDB • AWS S3 • Zustand`

- **Ecosystem Architecture:** Architected two digital platforms featuring a WCAG 2.1 AA Members Portal, an LMS Courses engine with relational Mongoose progress tracking, and the trauma-informed "Healing Hub" with instant confidential crisis escalation modals.
- **Engineering Standards & Scale:** Served as primary code gatekeeper reviewing 100% of frontend PRs, scaled the Education Hub and historical Queer Archive using AWS S3 optimization, and maintained 99.9% uptime across national advocacy traffic surges.

WeAreGriot — Full-Stack Engineer

High-Concurrency Ticketing, Merch E-Commerce & Operations Platform

`React 18 • TypeScript • Express • MongoDB • Sanity Studio v3 • Stripe`

- **High-Concurrency Engine:** Engineered event ticketing with temporary reservation holds and webhook-driven inventory rollbacks to eliminate overselling during flash ticket releases.
- **Operational Tooling:** Built door check-in redemption APIs with anti-double-scan validation and custom Sanity Studio v3 React operations tables with live CSV/PDF attendee roster exports.
